Re: Winning the 2018 Elections!

Without mentioning trump-trauma!

San Francisco-Chicago: We submitted a C40Cities Re-Invention Proposal for both Cities last year. Similar to the one we made in person to the **350 Mayors at the NABM** and **endorsed by them in '07**. As we “preached” then, “All Mayors are CEO’s!”

What we’re doing **here-** is providing a “menu” of **GSA Approved**, tested and **proven** green infrastructure building systems, which can be **duplicated by e-v-e-r-y City and Town in the USA**. Our CO2 Credit Finance strategy will finance **every C40City and town** that issues their own “**Green City Climate Bonds**” for infrastructure repair and building **Affordable Green Housing**. **This is easy, simple and it works! Read on!**

By installing our HVAC CO2X™ Catalyst in all City buildings and other HVAC stationery units, and every City vehicle- including Police, Fire, Buses, etc., each City earns **MONTHLY CO2 Credits**, and an equal amount of (10-25% monthly) **CASH-on** its electricity bills! Sounds, “Too good to be true?” Every vehicle will save gas, or fuel too. Immutable verification proof, via computerized dataloggers on each electric meter.

- 1.) The **CT Green Bank** is using **CO2 Credits** with its **EV Charging Stations**, **now!**
- 2.) This revenue stream can also be used to finance **Mobile Concrete Mixers**, locally operated- reduce CO2 emissions further, and will create more jobs. Allowing Cities to build/rebuild roads, sea walls, bicycle paths, pools and repair concrete, stucco, etc. anywhere. **Drum trucks are obsolete!** LOOK- READ- LEARN!
- 3.) **Water-Smart™** is produced in NV. However, it has been shipped all over the **world** to Countries (Dubai!) suffering from drought! CA, AZ, NV! LEARN!
- 4.) **Affordable Green Housing** is now a USA reality. With **WoW-Crete AAC** arriving this year from **Europe**, the future of Housing will change for the better. Read all about the most environmentally conscious, socially responsible building material on **Planet Earth** on our Technologies page (menu). We plan on introducing our own, **Rent-To-Own** in-house financing strategy. Watch!
- 5.) Our Policy is to fund specific programs that have **p-r-o-v-e-n** to treat opioid and cancer families, effectively- using **megabrain** & mind technologies. Menu! **Ask!**
